

# English for Mathematicians I

Ladislav Nebeský: An attempt to reconstruct two colours (detail)

**Read about and discuss mathematical topics in English, polish your English presentation skills, and expand your English vocabulary.**

**The course is intended to help you put together your own mathematical texts in English. Topics include using English at the appropriate level of formality; English grammar and pronunciation; formulating definitions and presenting proofs.**

**Recommended for undergraduates in their second year upward.**

**SIS code: NJAZ013.**
